

Sprint 1 — Phase 1 Scope

Deliver the core client/coach loop for fitness guidance

Goal: Deliver the core client/coach loop for fitness guidance: clients can log in, follow meal and training plans, and submit progress; coaches can invite clients, create plans, and review progress.

1. Mobile (Client)

1.1 Users

Feature	Description	Priority
Login	Authenticate into the mobile app using passwordless email sign-in.	P0

Acceptance criteria

Client can request a magic link or one-time password (OTP) using their email address.
Successful login redirects to the app home/dashboard.
Session/token is persisted across app restarts (where secure).

1.2 Food

Feature	Description	Priority
View meal plan	Display the current meal plan assigned by the coach.	P0
Record meals	Allow the client to log the meals they have eaten.	P0
View meal history	Show a history of previously recorded meals.	P1

Acceptance criteria

Meal plan is visible per day/week with meal type (breakfast, lunch, dinner, snack).
Client can mark meals as eaten, skipped, or partially eaten.
Recorded meals include timestamp.
Meal history is showing as list.

1.3 Training

Feature	Description	Priority
View training schedule	Display the client's assigned training schedule.	P0
Record training sessions	Allow the client to log completed training sessions.	P0
View training history	Show a history of recorded training sessions.	P1

Acceptance criteria

Training schedule lists exercises.
Client can start a session, mark exercises complete, and add results (weight, reps).
Completed sessions are saved with date/time and duration.
Training history is showing as list.

1.4 Progress

Feature	Description	Priority
Record progress form	Submit a progress form (weight, measurements, notes).	P0
View progress history	Display previously submitted progress forms and trends.	P1

Acceptance criteria

Progress form includes weight, body measurements, and subjective notes.
Client can submit progress forms on a daily basis with no submission limit.
History shows entries in a timeline view with basic trend indicators.
No restrictions on submission frequency (unlimited submissions allowed).

2. Web (Coach)

2.1 Users

Feature	Description	Priority
Coach login	Authenticate into the coach web app using passwordless email sign-in.	P0
Invite clients	Send invitations for clients to join the platform.	P0

Acceptance criteria — Coach login

Coach can request a magic link or one-time password (OTP) using their email address.
Invalid email addresses, expired links, and invalid OTPs show a clear error message.
Coach can complete sign-in through the emailed magic link or OTP without a password.
Successful login redirects to the coach dashboard.
Session/token is persisted securely across browser sessions.

Acceptance criteria — Invite clients

Coach can send an invite by email.
Invited client receives a signup/activation link.
Coach sees the invite status (pending, accepted, expired).

2.2 Food

Feature	Description	Priority
Plan meals	Create and assign meal plans to clients.	P0
Review meals progress	Review what clients have logged against the meal plan.	P1

Acceptance criteria

Coach can build meal plans with days, meal types, food items, quantities, and macros.
Meal plans can be assigned to one or more clients.
Review screen highlights compliance (completed, skipped, unlogged).

2.3 Training

Feature	Description	Priority
Plan training	Create and assign training programs/schedules to clients.	P0
Review training sessions	Review client-submitted training sessions.	P1

Acceptance criteria

Coach can create training plans with workouts, exercises, sets/ reps, and notes.
Plans can be assigned to clients with start dates.
Review screen shows session completion, results, and client notes.

2.4 Progress

Feature	Description	Priority
Review clients' progress	View submitted progress forms and trends per client.	P1

Acceptance criteria

Coach can view all progress forms for a selected client.
Dashboard shows key trends (weight change, measurement changes over time).
Progress form values are viewable in the selected client's timeline.

3. Technical Considerations

Area	Considerations
Authentication & Authorization	Separate roles for client and coach; protect endpoints by role.
Data Model	Users, meal plans, meal logs, training plans, training sessions, progress forms, invites.
Food & Workout Catalogs	Use dummy seed data for food and workout catalogs during development. Do not add or migrate the Excel-based databases in Sprint 1; complete the Excel migration in Sprint 2.
Audit & History	Every recorded entry must have a created/updated timestamp and created-by reference.
